

## INDEX TO VOLUME XXIX

### NOTE

- 1 Names of authors of papers, discussions and addresses are in **CAPS AND SMALL CAPS**.
- 2 Full or a breviated titles of papers are in *Italics*, except when following the names of discussors.
3. The Society is not responsible as a body for the statements of fact or opinion in its papers and discussions.

	PAGE
Affiliated Societies, Committee on, appointed.....	593
<i>Air Cooling of Automobile Engines</i> , JOHN WILKINSON, 203, ref .....	92
Heating of cylinders, causes and results of, and effect of design, with indicator cards (Figs. 1 and 2).....	203-205
Exhaust gases and exhaust openings, with card (Fig. 3).....	205
Summary of best conditions: Internal, 205, 206; External.....	206, 207
Characteristics of air cooled engine.....	207
ALDEN, G. I. (with J. R. BIBBINS), <i>Duty Test on Gas Power Plant</i> , 725; closure. ....	768
See <i>Gas Power Plant, Duty Test on</i>	
ALEXANDER, MAGNUS W., disc. College and Apprentice Training.....	503
ALLEN, CHARLES M., <i>Gasolene</i> (lecture), refs. 9.....	609
Aluminum as a material for automobiles.....	214
Amendments to By-Laws and Constitution.....	98
AMERICAN SOCIETY OF MECHANICAL ENGINEERS	
Merging of Mechanical Engineers Library Association with.....	471-600
To coöperate with Society for the Promotion of Engineering Education. ....	602
<i>Analysis of Locomotive Tests</i> , SIDNEY A. REEVE, 337, disc., 349, ref.....	94
See <i>Locomotive Tests, Analysis of</i>	
ANALYSIS, MECHANICAL, OF CAST IRON MIXTURES	
See <i>Foundry Cupola, etc.</i>	
ANGULAR LOAD (BALL) BEARINGS	
See <i>Bearings, Ball</i>	
APPRENTICE AND COLLEGE TRAINING	
See <i>Training, College and Apprentice</i> ; also Society for the Promotion of Engineering Education and <i>Education, Industrial</i>	
ARCHENHOLD, F. S., <i>Address</i> as participant in the Dedicatory Exercises of the Engineering Societies Building, ref.....	61
ASH, MOISTURE AND VOLATILES IN FUEL, AS AFFECTING GAS VALUE OF LOW GRADE FUELS	
See <i>Fuels, Low Grade, etc.</i>	
ATWATER, C. G., disc., The Rational Utilization of Low Grade Fuels in Gas Producers, 698, ref.....	589
AUTOMOBILE ASSOCIATION BOLTS AND NUTS	
See <i>Screws, Machine, etc.</i>	
AUTOMOBILE, BALL BEARINGS ON	
See <i>Bearings, Ball</i>	
<i>Automobile Engines, Air Cooling of</i> , JOHN WILKINSON	
See <i>Air Cooling, etc.</i> , 203, ref.....	92

	PAGE
<i>Automobiles, Materials for</i> , ELWOOD HAYNES, 209, ref.....	92
Characteristics of various materials.....	209
Nickel steel, 209; Nickel chrome steel: characteristics, 210; tests of samples differently treated, with table.....	211
Vanadium steel.....	211
Bronze and other alloys.....	213
Aluminum.....	214
Recapitulation.....	214
Strengths of various materials, with table.....	216
 Badge, New Junior, adoption of by Membership Committee, 96, ref.....	610
BAILEY, T. S., disc., Foundry Blower Practice, 952, ref.....	591
BAKER, SIR BENJAMIN: <i>In Memoriam</i> .....	1145
<i>Balancing of Pumping Engines</i> , The, A. F. NAGLE, 131, disc. 137, ref.....	92
See <i>Engines, Pumping, etc.</i>	
<i>Ball Bearings</i> , HENRY HESS, 367, disc. 464, ref.....	92
See <i>Bearings, Ball</i>	
BARRUS, GEORGE H., <i>Experience with Superheated Steam</i> , 299, ref.....	94
See <i>Steam, Superheated, Experience with</i>	
BASFORD, G. M., disc., College and Apprentice Training.....	516
BAXTER, W. J., <i>Address as participant in the Dedicatory Exercises of the Engineering Societies Building</i> , ref.....	61
<i>Bearings, Ball</i> , HENRY HESS, 367, disc. 464, ref.....	92
Appendix: Translation of Prof. STRIBECK's Report .....	419
CONTENTS OF MR. HESS' PAPER	
Introduction: Inception and scope of Prof. STRIBECK's Report .....	367
CHAP. 1. Translator's Résumé of Prof. STRIBECK's Report .....	368
CHAP. 2. Materials .....	371
CHAP. 3. CHARACTERISTICS OF VARIOUS BALL MAKES	
Scope and method of tests.....	374
Hardness, description of tests, with curves (Figs. 1-13).....	374-381
Surface character.....	381
Grain structure.....	381
Microstructure.....	382
CHAP. 4. VARIOUS TYPE CHARACTERISTICS	
Directions of loads in journals of automobiles.....	382
Radial bearings, with sketches (Figs. 14-16).....	382-386
Thrust bearings, with sketches (Fig. 17).....	384
Angular load bearings, with sketches (Figs. 18-36).....	385
CHAP. 5. CORRECT BALL MOUNTING	
Directions, advantages of following same.....	391
Illustrations of correct mountings, with sketches (Figs. 37-54).....	393-402
CHAP. 6. VARIOUS BALL-MOUNTED AUTOMOBILE ELEMENTS TAKEN FROM CURRENT PRACTICE	
Introduction.....	402
Built-up crankshafts, description and views (Figs. 55 and 56).....	403-407
One-piece crankshafts, with drawings (Fig. 57) .....	405, 407, 408
Crankshaft bearing selection, with drawings (Figs. 58 and 59).....	406, 408-410
Truck gear case, with drawing (Fig. 60).....	410, 411
Change gear bearing size selection.....	410

***Bearings, Ball.***—Continued

	<b>PAGE</b>
Sprocket bearings and size selection, with drawing (Fig. 61), 412-413	
Rear and front wheel and steering pivot designs, with drawings (Figs. 62-65).....	413-415
Bevel driven rear axles, with drawing (Fig. 64).....	415-417
Hub and axle bearing selection.....	417
<b>CHAP. 7. Conclusion.</b> .....	<b>418</b>
<b>PROF. STRIBECK'S REPORT (APPENDIX)</b>	
Introduction, inception and scope of the report.....	420
Occurrences at the place of pressure.....	420
Experiments on the compression of hardened steel balls and discs, with views, sketches and charts (Figs. 1-15), and tabulation of calculated and observed results (Tables 1 and 2).....	423-448
The load at the elastic limit and its relation to the ball diameter, with refs. to charts (Fig. 6, 8, 9, 10, 12, and 13).....	433, 435-445
The equation for the permissible load, with charts (Figs. 12, 14, and 15).....	439-448
The frictional work of ball bearings: The movements and the equation for the frictional work, with diagrams (Figs. 16-18).....	444-453
<b>EXPERIMENTS WITH BALL BEARINGS</b>	
The friction scale of the Central Laboratory, description, with diagram (Fig. 19) and view (Fig. 20).....	452-455
Carrying out the experiments.....	455
The frictional values, with tabulations (including Table 4) and sketches (Figs. 21-25).....	457-463
Permissible specific loads $k$ , with refs. to sketches (Figs. 21 and 25).....	455, 461-464
<b>BEEN, PETER H.:</b> Obituary.....	1173
<b>BELL, ALEXANDER GRAHAM</b> , participant in the Dedicatory Exercises of the Engineering Societies Building, as recipient of JOHN FRITZ Gold Medal, abs. 61, ref.....	52
<b>Bench Work, A Foundry for</b> , W. J. KEEP and EMMET DWYER, 891, disc. 895, ref.....	590
See <i>Foundry for Bench Work, A</i>	
<b>BERRY, EDGAR H.</b> , <i>Patterns for Repetition Work</i> , 961, closure 996, refs. 591, 1014; disc. Standard Proportions for Machine Screws, abs. 114, ref.....	91
<b>BIBBINS, J. R.</b> (with G. I. ALDEN), <i>Duty Test on Gas Power Plant</i> , 725, closure 768, ref. 589; disc. The Rational Utilization of Low-Grade Fuels in Gas Producers, 703, ref.....	589
See <i>Gas Power Plant, Duty Test on</i>	
<b>BIOGRAPHICAL SKETCHES</b>	
<b>FREDERICK REMSEN HUTTON, 1</b> .....	63
<b>RALPH WAINWRIGHT POPE</b> .....	62
<b>ROSSITER WORTHINGTON RAYMOND</b> .....	63
<b>CALVIN WINSOR RICE</b> .....	5
<b>BIRD, W. W.</b> , disc.; <i>Foundry Cupola and Iron Mixtures</i> , 921, ref.....	591
<b>BLAUVELT, W. H.</b> , disc. <i>Duty Test on Gas Power Plant</i> , 761, ref. 589; disc. The Rational Utilization of Low Grade Fuels in Gas Producers, 710, ref. 589	
<b>Blower Practice, Foundry</b> , WALTER B. SNOW, 923, disc. 946, ref.....	591
See <i>Foundry Blower Practice</i>	

	PAGE
Blower, Sturtevant, Performance of.....	952-958
Boiler manufacturers, An indictment of.....	268
Boilers, locomotive, Essential dimensions of five.....	337
BOLE, W. A., <i>The Foundry Department and the Department of Engineering Design</i> , 849, closure 864, ref.....	590
See <i>Foundry Department, The, etc.</i>	
BOLTON, REGINALD PELHAM, disc. A High Speed Elevator, 572; <i>Superheat and Furnace Relations</i> , 261, closure 273, ref.....	93
See <i>Superheat and Furnace Relations</i>	
BOLTS AND NUTS, AUTOMOBILE ASSOCIATION	
See <i>Screws, Machine, etc.</i>	
BOOKWALTER, MAYOR, of Indianapolis, <i>Address of Welcome</i> , ref.....	91
BOYER, F. H., disc. Refrigerating Machines, ref.....	92
Brake cylinder for checking recoil, diagrammatic sketch.....	73
BRANDON, G. R., disc. Foundry Cupola and Iron Mixtures, 919, ref .....	591
BREAKAGE OF CASTINGS	
See <i>Foundry Department, The, etc.</i>	
BRECKENRIDGE, LESTER P., disc., Duty Test on Gas Power Plant, 764, ref .....	589
Brine, calcium chlorid, Table of strengths of solution, specific gravities and freezing points.....	194
BRIQUETTING OF LOW GRADE FUELS FOR USE IN GAS PRODUCERS	
See <i>Fuels, Low Grade, etc.</i>	
Bronze and other alloys as materials for automobiles.....	213
BROWN, CHARLES S., Appointed Honorary Vice-President.....	610
BROWN COAL AND LIGNITE IN GAS PRODUCERS	
See <i>Fuels, Low Grade, etc.</i>	
BROWN, J. ROWLAND, disc., Superheat and Furnace Relations, 265, ref. 93; disc., Materials for the Control of Superheated Steam, ref.....	94
BROWN, THOMAS E., disc., A High Speed Elevator.....	564
BRYAN, WILLIAM H., disc., A High Speed Elevator.....	540
BUILDING, ENGINEERING SOCIETIES	
Dedication of: Dedicatory Exercises, April 16 and 17, 1907, Program, 51; ref. 609; Professional Sessions of the Founder Societies, April 15, 18 and 19, 1907, Program.....	53
First Annual Meeting in.....	587
See <i>Headquarters of the Society, The New</i>	
BULL, STORM: Obituary.....	1173
BURLINGAME, LUTHER D., disc. Industrial Education, 1131, ref. 592; disc., Standard Proportions for Machine Screws, abs. 114, 118, ref.....	91
Burner, gas, used in long kiln.....	145
By-Laws, Amendments to, 98.....	602
BY-PRODUCTS OF THE GAS PRODUCER	
See <i>Fuels, Low Grade, etc.</i>	
CAHOON, JAMES BLAKE: Obituary.....	1173
Calcium chlorid brine, table of strengths of solutions, specific*gravities and freezing points.....	194
Calorific value of gas, Logs of 47, .....	48
CARDS, INDICATOR	
See <i>Indicator Cards</i>	

	PAGE
CARHART, A. B., disc. The Foundry Department and the Department of Engineering Design .....	861
CARNEGIE, ANDREW, participant in the Dedicatory Exercises of the Engineering Societies Building, <i>Address</i> , abs. 56, refs. 51; unveiling of bust of, ref. 58; Made Honorary Member, 95, ref. ....	609
CARPENTER, J. M., disc. Standard Proportions of Machine Screws, abs. 117, ref. ....	91
CARPENTER, R. C., disc. Refrigerating Machines, ref. 92; disc. The Economy of the Long Kiln, 150, ref. ....	92
Carriage, BUFFINGTON-CROZIER, for disappearing gun, sketch.....	81
CASTINGS, SPECIAL METHODS OF COOLING See <i>Foundry Department, The, etc.</i>	
CHAPMAN, W. B., disc. The Rational Utilization of Low-Grade Fuels in Gas Producers, 701, ref. ....	589
Churchward steam railway motor car.....	219-222, 224
Clearance space in gas engines, Methods of varying .....	818-824
CLICHÉS TABLES See <i>Molding Machine, etc.</i>	
COAL CONSUMPTION IN OPERATING GAS ENGINE See <i>Gas Power Plant, Duty Test on</i>	
Coke breeze and dust in the gas producer.....	683
Coke making, by-product, as affecting gas value of low grade fuels.....	673
COKE, QUALITY OF, USED IN FOUNDRY CUPOLA See <i>Foundry Cupola, etc.</i>	
COLE, FRANCIS J., disc. The Cole Locomotive Superheater, 294, ref. ....	94
<i>Cole Locomotive Superheater, The</i> , W. F. M. GOSS, 289, disc. 294, ref. .... See <i>Superheater, The Cole, etc., and Superheaters for Locomotives</i>	94
<i>Collapsing Pressures of Lap Welded Steel Tubes</i> , REID T. STEWART, 123, ref. .... See <i>Tubes, Lap Welded Steel, etc.</i>	92
College and Apprentice Training, JOHN PRICE JACKSON, 473, disc. 490, refs. 471, 609 See <i>Training, College and Apprentice</i> ; also Society for the Promotion of Engineering Education, and <i>Education, Industrial</i>	
Color Photography Lecture by F. E. IVES, assisted by A. R. STIEGLITZ, abs. ....	589
Booklet on, by H. F. J. PORTER, ref. ....	590
COMBUSTION IN THE GAS PRODUCER, CONDITIONS OF See <i>Fuels, Low Grade, etc.</i>	
COMMITTEES, SPECIAL, PERSONNEL OF .....	VI
COMMITTEES, STANDING	
ANNUAL REPORTS OF	
Presentation, 609, ref. ....	588
Finance.....	611
Meetings.....	614
Land and Building Fund.....	615
Publication.....	617
Membership.....	618
Standardization.....	619
Library.....	620
PERSONNEL OF .....	I

	PAGE
Communications at the Dedicatory Exercises of the Engineering Societies	
Building, refs. 51, 52, 54, 55.....	61
Compressed air power in the foundry.....	880
<b>COMPRESSION OF HARDENED STEEL BALLS AND DISKS</b>	
See <i>Bearings, Ball</i>	
Constant Pressure lines for temperature-entropy diagram.....	277
<b>CONTENTS OF VOLUME 29, TABLE OF</b> .....	<b>IX</b>
Control of Internal Combustion in Gas Engines, CHARLES EDWARD LUCKE, 775, disc. 791, ref.....	589
See <i>Internal Combustion in Gas Engines, Control of</i>	
Control, Positive, of traction elevator.....	582-586
Control of Superheated Steam, Materials for, M. W. KELLOGG, 355, disc. 362, ref.....	94
See <i>Steam, Superheated, Materials for, etc.</i>	
COOLEY, M. E., Appointed Honorary Vice-President.....	610
Cooling, Air, of Automobile Engines, JOHN WILKINSON, 203, ref.....	92
See <i>Air Cooling, etc.</i>	
CORLISS, GEORGE H., portrait of, presented to the Society.....	610
Cost of Heating Store Houses, H. O. LACOUNT, 159, disc. 195, ref.....	93
See <i>Heating Store Houses, etc.</i>	
Council, sense of in regard to the monthly meetings, New York, 9; Action of conferring Honorary Membership upon ANDREW CARNEGIE: Action of upon Amendments to By-Laws and Constitution, 98, 602; Annual Report.....	609
CROSS, C. W., disc. College and Apprentice Training, 495; Industrial Education, 1128, ref.....	592
CROZIER, WILLIAM, participant in the Professional Sessions of the Founder Societies, Meeting of American Society of Mechanical Engineers; <i>The Ordnance Department as an Engineering Organization</i> , 65, refs. 11, 53, 609.....	610
See <i>Ordnance Department, etc.</i>	
<b>CULM, MINE, WASH BANK REFUSE, ETC., IN THE GAS PRODUCER</b>	
See <i>Fuels, Low Grade, etc.</i>	
Cupola, Foundry, and Iron Mixtures, W. J. KEEF, 903, disc. 919, ref.....	591
See <i>Foundry Cupola, etc.</i>	
Cylinder performance of locomotive served with superheated steam .....	294
Daimler gasoline railway motor cars, 239.....	240
Deaths during the year, reported by Secretary.....	610
Dedication of Engineering Societies Building: Dedicatory Exercises, April 16 and 17, 1907, Program 51, ref. 609; Professional Sessions of the Founder Societies, April 15, 18 and 19, 1907, Program.....	53
DERBYSHIRE, WILLIAM H.: Obituary.....	1174
Design, Engine, Adapted for the Use of Superheated Steam, MAX E. R. TOLTZ, 1069, disc. 1079, ref.....	591
See <i>Engine Design Adapted for the Use of Highly Superheated Steam</i>	
DESIGN, ENGINEERING, DEPARTMENT OF	
See <i>Foundry Department, etc.</i>	
Diesel engine.....	846

	PAGE
DIRKS, H. B., disc. The Specific Heat of Superheated Steam, ref . . . . .	93
Dixwell experiments on superheating.....	299
DODGE, A. R., disc. The Specific Heat of Superheated Steam, 1062, ref.....	591
DOUGLAS, JAMES, <i>Address</i> as participant in the Dedicatory Exercises of the Engineering Societies Building, ref . . . . .	52
DOW, ALEX Appointed Honorary Vice-President.....	610
DRY-PIPE SPRINKLER SYSTEMS, COST OF See <i>Heating Store Houses, etc.</i>	
Dust determinator, Sargent, Detail sketch of flow of gas in, 45; exterior view.....	46
<i>Duty Test on Gas Power Plant</i> , G. I. ALDEN and J. R. BIBBINS, 725, disc. 761, ref.....	589
See <i>Gas Power Plant, Duty Test on</i>	
Dwyer, EMMET (joint author, with W. J. KEEF), <i>A Foundry for Bench Work</i> , 891, closure 895, ref.....	590
ECONOMY OF ENGINE USING SUPERHEATED STEAM	
See <i>Engine Design Adapted for the Use of Highly Superheated Steam</i>	
Economy of the Long Kiln, The, E. C. SOPER, 143, disc. 149, ref . . . . .	92
See <i>Kiln, Long, etc.</i>	
EDSON, JARVIS B., Appointed Honorary Vice-President.....	610
<i>Education, Industrial</i> , W. B. RUSSELL, 1121, disc. 1128, ref.....	592
See also Society for the Promotion of Engineering Education, and <i>College and Apprentice Training</i>	
EICHBERG, FREDERICK, <i>Address</i> as participant in the Dedicatory Exercises of the Engineering Societies Building, ref . . . . .	61
ELDRED, BYRON E., disc. The Economy of the Long Kiln, 152, ref . . . . .	92
ELECTIONS	
Membership, 96.....	603
Officers .....	588
Electric generator tests, in connection with gas engine tests, 747, 748.....	750
Electric power in the foundry.....	879
<i>Elevator, A High Speed</i> : Gearless 1 to 1 traction electric elevators for Singer and Metropolitan Life buildings, New York. CHARLES R. PRATT, 531, disc. 538, refs. 472.....	609
General description.....	531
Advantages.....	532
General discussion of elevator constructions.....	532
DISCUSSION	
ORMAN B. HUMPHREY: <i>ESSENTIAL ELEMENTS OF PASSENGER ELE- VATOR INSTALLATIONS</i>	
Safety devices.....	538
Speed.....	539
Economy of operation.....	540
WILLIAM H. BRYAN, General .....	540
W. F. HENDRY, General .....	543
J. W. MABBS: Presentation of rack-and-pinion safety elevator of Chicago Board of Trade, with views and drawings (Figs. 1-5). 545-553	

	PAGE
<i>Elevator, A High Speed</i> —Continued	
E. S. MATTHEWS	
Earlier types of friction drive elevators, relative advantages of different types, and discussion of safety devices, with sketches (Figs. 1-8).....	553-564
Mathematical discussion of cable friction (with equations 1-6).....	556-558
THOMAS E. BROWN: General .....	564
CLYDE R. PLACE: General .....	568
C. W. NAYLOR: General .....	571
R. P. BOLTON: General .....	572
G. A. ORROK: Description of combined traction and plunger type elevator, with sketches and curves (Figs. 1 and 2).....	577-580
JOHN D. IHLDER: General .....	580
F. T. ELLITHORPE: General .....	581
Closure: Description of positive control of traction elevator, with drawing (Fig. 1) .....	582-586
ELLITHORPE, F. T., disc. A High Speed Elevator.....	581
EMERSON, HARRINGTON, disc. Engine Design Adapted for the Use of Highly Superheated Steam, 1079, ref. 591; European Railway Motor Cars, 244, ref.....	92
<i>Engine Design Adapted for the Use of Highly Superheated Steam</i> , MAX E. R. TOLTZ, 1069, disc. 1079, ref.....	591
Historical.....	1069
Features of design, with curves and drawings (Figs. 1-8) and economy data (Tables 1-3), 1070-1079, and (closure).....	1089
Engine, Wolf steam, efficiency of, 717.....	722
<i>Engines, Automobile, Air Cooling of</i> , JOHN WILKINSON, 203, ref.....	92
See <i>Air Cooling, etc.</i>	
<i>Engines, Pumping, The Balancing of</i> , A. F. NAGLE, 131, disc. 137, ref.....	92
Percentage of work in each cylinder at different loads (Table 1) .....	131
Condition of heads on suction and discharge .....	132
FIVE EXTREME CONDITIONS OF COMBINED HEADS	
Statement of conditions .....	132
Net pressures (Table 2) .....	133
Equalization of work on up and down strokes, 133 .....	134
Grouping of same (Table 3).....	134
Diagram showing unbalanced pressures (Fig. 1).....	135
Plunger diameters (Table 4).....	137

Modifications of design of injector for use of superheated steam.....	312
<i>Steam, Superheated, on Locomotives</i> , HENRY H. VAUGHAN, 313, disc. 332, ref.	
Applications.....	94
<b>TYPES: DESCRIPTIONS OF CONSTRUCTION AND OPERATION, WITH DRAWINGS</b>	
General features of design.....	314
Schmidt smoke-box, smoke-tube and fire-tube types (Figs. 1-3).....	313-331
Cole Field-tube and return-bend types (Figs. 4 and 5).....	313-331
Vaughan-Horsey type (Fig. 6) .....	313-331
Construction.....	322
Economical results (Tables 1-3) .....	323
Maintenance results.....	329
Lubrication.....	331
Conclusions.....	332

	PAGE
<i>Steam, Superheated, Materials for the Control of</i> , M. W. KELLOGG, 355, disc. 362, ref.....	94
General scope of the paper.....	355
Pipes and joints, with sketches Fig. 1 and Fig. 1 in. disc., 355, 356, 358, 360, .....	366
Fittings, including welded work, with sketch, Fig. 2.....	357-365
Valves.....	358
Metals.....	358
Gaskets,.....	361
<i>Steam, Superheated, The Specific Heat of</i> , C. C. THOMAS, 1021, disc. 1057, ref. 362, ref.....	591
Importance of the subject, and reference to special apparatus.....	1021
Preliminary apparatus and experiments, with drawings of apparatus, and curves (Figs. 1, 2, 19, and 20) 1022-1027, 1049.....	1050
Final apparatus and experiments, with drawings of apparatus and curves (Figs. 3-12) 1026.....	1027-1038
Methods by which results were obtained and corroborated.....	1034
<b>THE QUESTION OF CONDUCTION AND RADIATION LOSSES FROM THE CALORIMETER</b>	
<b>FIRST METHOD</b>	
Procedure and results, with curves (Figs. 13 and 14), 1039, 1041.....	1042
Calculations.....	1040
<b>SECOND METHOD</b>	
Procedure and results, with curves (Figs. 15-17), and Table 1, 1043-1047.....	1054-1056
Comparison of results with those obtained in other investigations, with curves (Figs. 18-20).....	1047-1051
Conclusions and acknowledgments.....	1051
<b>DISCUSSION</b>	
CECIL H. PEABODY: General, with curves and diagram (Figs. 1 and 2).....	1057-1060
J. A. MOYER: General, 1060.....	1065
A. R. DODGE: General, with comparisons of specific heats at the same total heat and superheat (Tables 1 and 2).....	1062-1064
SANFORD A. MOSS: General,.....	1064
Steam turbine performance figures.....	764
